Dhruv Achar

AI & Data Analyst | Generative AI | Agentic AI | AWS | Data Engineering

Gurgaon, India | +91-8800825438 | dhruv.achar2004@gmail.com | LinkedIn | GitHub

Education

B.Tech – Electronics & Communication, Minor: Data Science *Nov 2026*
MIT Manipal **CGPA: 7.63/10**

High School – PCM + CS *Jul 2022*
DPS Gurgaon **Class XII: 94.6%**

Skills

- **Programming:** Python, SQL
- **AI & Machine Learning:** scikit-learn, PySpark, EDA, Feature Engineering, Predictive Modeling
- **Generative AI & LLMs:** LLM Applications, Agentic AI Systems, Prompt Engineering
- **Data Engineering:** Apache Kafka, MongoDB
- **Visualization & Tools:** Tableau, Power BI, Plotly, Git, GitHub, Streamlit, Jupyter

Experience

Deloitte India – *Intelligent Automation & Agentic AI Analyst* *Jan 2026 – Present*
Bengaluru, Karnataka

- Developed enterprise automation workflows using **Automation Anywhere A360**, improving process efficiency by **30%** through automated data processing, validation, and exception handling.
- Designed modular bot workflows using **Data Tables, dictionaries, conditional logic, and reusable components**, reducing manual intervention by **35%**.
- Built and orchestrated **Camunda BPMN workflows**, reducing process turnaround time by **25%** through automated task routing and decision logic.
- Optimized end-to-end automation pipelines across **15+ process components**, reducing recurring execution errors by **30%**.

Bosch Chassis Pvt. Ltd. – *Project Intern* *Jun–Jul 2024*
Pune, Maharashtra

- Redesigned EV emergency stop circuit, improving safety compliance by **35%**.
- Diagnosed EV powertrain systems using **CAN protocols** and **ISO 26262**.

Projects

Market Intelligence Engine – Python, LangGraph, LangChain, FastAPI, Ollama, Qwen2.5, PostgreSQL, Docker

- Built a multi-agent AI consulting system using **LangGraph** and **LangChain** for market research, competitor analysis, SWOT, financial analysis, and report generation.
- Designed specialized Research, Competitor, SWOT, Financial, and Report agents using structured state-based orchestration.
- Integrated **Ollama/Qwen2.5** with web research APIs to generate data-driven insights and consulting-style reports.
- Developed **FastAPI + PostgreSQL** backend, containerized with Docker, and optimized local LLM inference for lower latency.

FPL Analytics Dashboard – R, Shiny

- Built an interactive analytics dashboard analyzing **600+ players** with predictive filtering, player comparisons, and team optimization models.
- Designed performance metrics and visualizations to support data-driven team selection.

Stock Price Analytics Platform – Python, Streamlit, Plotly, yFinance

- Built a real-time stock analytics platform with **RSI, MACD, Bollinger Bands**, automated alerts, and interactive market visualizations.
- Implemented automated data pipelines and monitoring features, improving monitoring efficiency by **50%**.

Achievements

- **10/10 GPA** – Perfect 8th Semester GPA, MIT Manipal
- **100% in CBSE Computer Science** – DPS Computer Science Proficiency Award; Director's Gold Medal for consistent academic excellence from Grades 5th–12th
- **Football** – Haryana U-14 National Player; 4× State Player for Gurgaon; Intra-University Winner with MIT Manipal
- **Gold Medalist** – International French Olympiad
